

Carlyann McLaren graduated from Northwest Nazarene College in 1999, and began Advocates for Inclusion with her family soon after graduating. As a family owned business they value the importance of the entire family, and focus coming alongside individuals, as well as their families, to assist them with working towards their goals and dreams.

Carlyann has worked in this field since the age of seventeen, starting as a Developmental Technician, and has loved every moment of it. Carlyann enjoys watching individuals and families she cares about achieve their goals and dreams, and knowing that AFI has a small part of their success is very rewarding.
